**Subject:** DON'T LET FLORIDA ASSUME THE 404 PROGRAM

We know that water is a critical resource, and clean water is becoming more important as each day passes and each development is approved or expanded. Potable water is going to become a problem in Florida in the next 10 years. Making it easier to destroy wetlands or negatively impact water quality or quantity should not happen. Keep the process as it is.

Florida doesn't have the resources to managed the programs it's supposed to be managing now; giving them more responsibility and say in how water resources are managed is a mistake.
